## MAYOR O'NEIL IS AFTER THE SPEEDERS

One of the first duties that Mayor William O'Neil is going to attend to, is seeing that the law against speeding and other unlawful auto driving is strictly enforced in Richmond.

He said Friday morning that he had instructed the policemen to be especially on the lookout for motorists who do not seem to have regard for the rights or lives of others, and if there is any way to break up the practice of some young men of whirling through town at 50 or 60 miles an hour he's going to find it out. He has several plans under consideration that may prove unusually effective he thinks, but isn't going to make them public until they begin to show results. He will undoubtedly receive the commendation of all citizens in this work.

A large number of motorists have been summoned to appear in police court before Judge G. M. Smith tonight, and tell why they have been speeding or neglecting to obey the law about auto lights.

## DODGE BROS. NAME NEW LOCAL DEALERS

**Woods and White To Handle Popular Car In Five Counties In This Section**

Announcement is made by Dodge Brothers, Detroit, of the appointment of Woods and White their dealers in Richmond. They will occupy the old Madison Garage on Second street with a complete salesroom and service station. Their territory includes Madison, Garrard, Estill, Rockcastle and Jackson counties.

The remarkable popularity of the Dodge Brothers motor car has caused automobile men all over the country to clamor for sales privileges, but Dodge Bros. policy of quality in selling methods, as well as quality in the car, requires a painstaking investigation in every instance before a selection is made. In Messrs. Woods and White, Dodge Bros. have dealers on whom they believe they may rely for both progressiveness and fair business methods.

The prompt manner in which Dodge Bros. assumed one of the foremost positions in the automobile industry is regarded as a striking testimonial to the high regard in which their name was held by the public even before they marketed a motor car bearing their name. Prior to that time Dodge Bros. had built the vital parts for more than half a million other cars, establishing a reputation for thoroughness and mechanical skill.

It is significant that the first Dodge Bros. motor car ever built was made up exactly as a car is made in the regular line of production. Ordinarily the "experimental job," as the first car is known, is built of castings because of the great time and expense involved in preparing dies for forging. Dodge Bros., however, decided that their experimental car should be like the car they expected to build, in every detail, so that neither they nor the public might be "fooled." So they spent almost a year in making these dies and preparing otherwise for a completely manufactured car. As a result, when the car was built they knew what they had and what they and the public might expect of their products. As a further result this first car, although only an "experimental job" is still in daily service on the hardest runs—experimenting under all sorts of road conditions—and with a record of more than 150,000 miles behind it. This is but an illustration of the many things unique in the history of Dodge Bros. as manufacturers.

Public approval of their principles of thoroughness is seen in the rapid expansion of Dodge Bros. works made necessary by public demand. In December, 1914, it was a plant of less than 20 acres. Today Dodge Bros. works covers 100 acres of floor space.

Quite a number of neighbors have called to see the freak fowl, which Mrs. Masters is going to endeavor to raise to maturity.

TWO stray heifers came to my place July 1st; owner can have same by proving ownership and paying all charges. G. R. Sourlin, phone 355—M. 19 2p
